New name for engineering excellence: REpower is now Senvion

Hamburg: REpower Systems SE, a wholly owned subsidiary of the Suzlon Group, the world's fifth-largest* manufacturer of wind turbines, is changing its name as announced: from today, the company will be known as Senvion SE. The Hamburg-based wind turbine manufacturer will now identify itself using the new Senvion branding worldwide.

The company has been using the name REpower under licence since 2001. The rights belong to a Swiss company that is now using this name itself. Both the name and the entire external corporate design of the Hamburg-based company have therefore been changed. Like the green colour scheme of the new logo, the elements of the name Senvion refer to the company's renewable energy operations: the S stands for the sustainability of its products, EN stands for energy, VI for vision and ON for being switched on.

Andreas Nauen, CEO of Senvion SE: "In addition to having unique products and services, we are now also the only company with this name. Our more than 3,300 employees around the world work energetically and enthusiastically to find the best solution for every project. Our customers and business partners can sense that with us they will always come first. This claim is emphasised by the figure "1" in our logo. As Senvion, we will continue along our path as a strong and innovative brand in the wind energy industry."

About Senvion:

Senvion SE, a wholly owned subsidiary of the Suzlon Group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 metres to 152 metres. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the Senvion TechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven, as well as Portugal, India and China. With more than 3,300 employees worldwide, the company - headquartered in Hamburg - makes use of the experience gained from the manufacture and installation of more than 5,000 wind turbines around the world. Senvion is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the UK, Italy, Portugal, Sweden, Poland and Spain as well as on a global level in the USA, China, Australia and Canada. About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity and marketshare, at the end of 2012. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 22,500 MW of wind energy capacity installed, operations across over 30 countries and a workforce of over 10,000. The Group offers one of the most comprehensive product portfolios – ranging from sub-megawatt onshore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost, manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including Senvion SE. Visit us at www.suzlon.com
